

Recommended Starter Pack

StepsWeb is suitable as a whole-school resource and can support any aspect of the curriculum. However, with remedial learners, it is strongly recommended that StepsWeb is used in conjunction with the workbook courses or to support another structured literacy progression. Learners at the early stages of literacy, or with major literacy needs, will also benefit from the hands-on game and activity materials in the Schools Resource Pack.

Stepsweb

StepsWeb runs through a web browser, and is compatible with iPads, Chromebooks, and tablets, as well as PC and Mac. The cost is on a per-student basis, with a minimum of 5 licences for schools. Please note: This is a tiered pricing system. All prices excl gst.

StepsWeb logins 1 – 15	-	\$30 each pa
StepsWeb logins 16 – 299	-	\$10 each pa
StepsWeb logins 300+	-	\$5 each pa

Workbook Courses

There are two levels. **Steps to Literacy Initial** caters for learners with a spelling age of below 7. **Steps to Literacy** caters for spelling ages of 7+. Each level has a Teacher Manual and Answer Booklet. Learners need their own workbook (\$11.50 each). Workbooks are not photocopiable.

Combined Starter Pack

This is a good starting point for schools intending to use the workbook courses. It includes the two Teacher Manuals, 2 Answer Booklets and one of each workbook (12 in total), which most schools keep as a 'reference set'. The next stage is for the school to test their learners to see which level they need and order individual workbooks for those learners.

Combined Starter Pack	-	\$242 (saving of \$26)

Schools Resource Pack

Comprehensive pack of hands-on game and activity materials, including wipe-clean gameboards and phonological materials. It is particularly important in the early stages of literacy. Materials can be purchased individually, but there is a saving (\$29.50) when purchasing the complete pack.
